SUMMARY:

Full-Stack AI Developer proficient in the MERN stack (MongoDB, Express.js, React.js, Node.js, Next.js) with expertise in AI and n8n integrations to build dynamic, intelligent, and scalable web applications.

TECHNICAL SKILLS:

- **Frontend** - JavaScript , React js , Next js15 , TypeScript .
- **Backend** - Node.js , Express.js, TypeScript .
- **Database** - MongoDB , MySql , Postgresql , Supabase .
- **DevOps** - Docker, Docker Compose, AWS, CI/CD, Microservices, Monitoring, Secrets Management.
- **AI Automation** - n8n, Make, Zapier & Other No-Code Tools .
- **Mobile-App** - ReactNative - ExpoCli , Android , IOS.
- **More** - GitHub , PostMan , Shadcn , WebSockets(Socket.io) , StateManagement(Redux-Toolkit).

Experience:

[Cloud Rexpo | Full Stack & AI Developer] | (January 2025 – Present)

- Developing full-stack and AI-driven applications at **Cloud Rexpo**, leading projects from design to deployment with end-to-end admin control and analytics.
- Created an **AI Interview Bot Website** using OpenAI API for intelligent question generation, evaluation, and user feedback , using N8N WorkFlow.
- Deployed scalable systems via **Docker, Nginx, Linux**, and implemented **CI/CD pipelines** with load balancing for automation, performance, and 100% uptime.

[ENCS | Backend Developer] | (August 2023– December 2024) - 1.6 years

Tech Stack : Node Js , Express Js , MongoDB , PostgreSQL , Apis , Devops

- Developed and maintained scalable backend systems, including RESTful APIs, database schemas, authentication flows, and third-party integrations—ensuring high performance and reliability.
- Optimized legacy APIs, improved query performance, fixed production issues, and implemented best practices in security, code quality, and backend architecture.

[Firefly Tech Solutions | Database Manager] | (July 2022– March 2023) - 9 months

Tech Stack : Node Js , Express Js , MongoDB , PostgreSQL , Apis , Devops

- Developed and maintained scalable backend systems including RESTful APIs, authentication flows, automation workflows, and server-side logic—ensuring performance, security, and smooth integration with frontend apps..
- Designed and optimized SQL/NoSQL databases, created efficient schemas, tuned queries, and managed cloud databases using AWS RDS, improving reliability, scalability, and overall system performance.

PROJECTS:

[\[LINK\]](#) **BachatBzr- Ecommerce-Store** (front-end and backend development)

Tech Stack : Next.js , TailwindCSS , Supabase(Authentication , Realtime , Database) , Redux , Cloudinary , Stripe.

- **Server Power** : Next.js 14 powers frontend & backend with fast, scalable, and SEO-friendly operations.
- **UI Craftsmanship** : Shadcn UI + Tailwind CSS, responsive designs with UX via MUI & Radix UI.
- **Request Maestro** : Axios ensures smooth API communication and real-time updates.
- **Data Hub** : Supabase handles authentication, database, realtime features, Cloudinary image hosting.
- **Feature** : Full e-commerce flow – product CRUD, cart, checkout, Stripe payments, real-time product updates, user role & ban control, order/shipping tracking, Leopard Courier automation, email/Google login, and secure role-based access.

Education:

Bachelor of Science in Computer Science:

Government College University Faisalabad (GCUF) | Expected Graduation: 2027.
